MARINE GROUP

Iconic Marine Group and Dutch Yacht-builder Steeler Yachts are proud to unveil the jointly developed 'Dutch American' yachts.

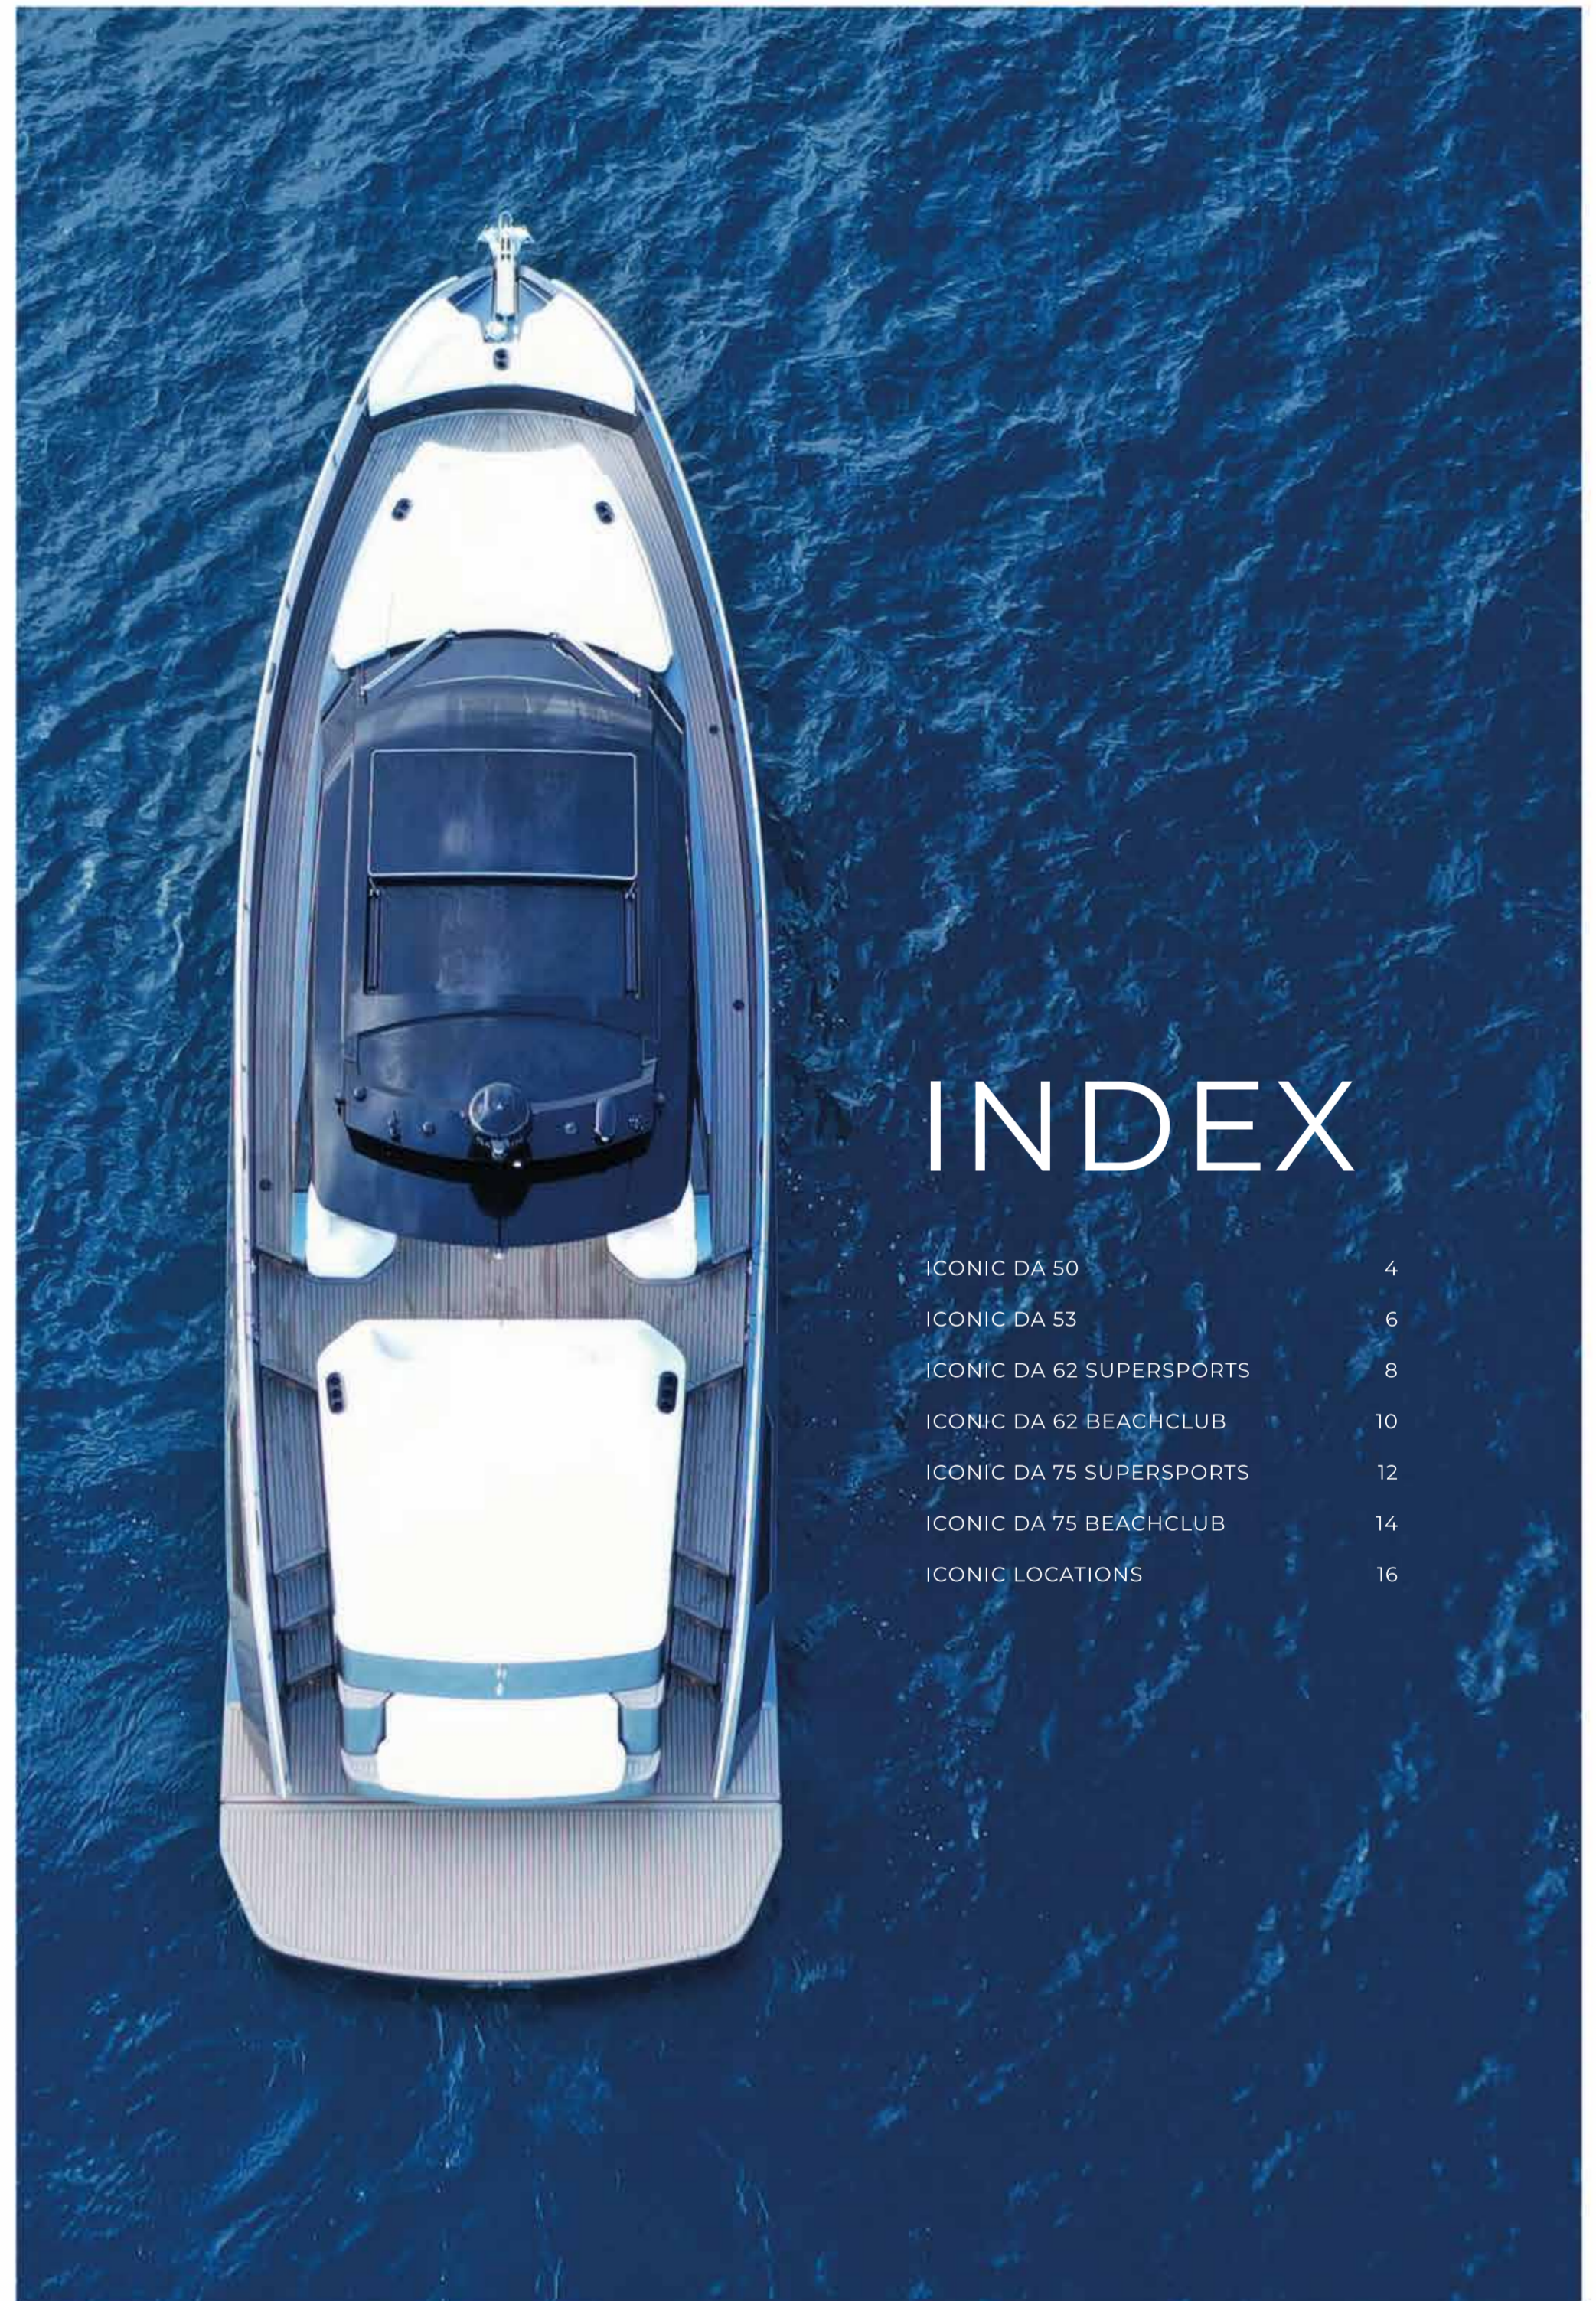

The Dutch American yachts are specially designed and crafted for highly demanding US clients, aiming for nothing less than 'the best yacht with the best service'.

All models, ranging from 50 to 75 feet, are constructed in aluminum and finished to the highest level of Dutch craftsmanship. Aluminum constructions are the preferred choice for superyachts, offering various advantages over commonly used GRP hulls in terms of strength, weight distribution, stability, safety, gloss rate, and customization possibilities.

All models will benefit from the numerous patented comfort solutions Steeler Yachts has introduced to the market over the last fifteen years. Steeler's reputation for quality and innovation has earned them a global reputation for excellence, along with multiple international awards, including three European Powerboat of the Year titles and a recent Best boat of the Show nomination at FLIBS.

Iconic Marine Group, recognized for its exceptional service and commitment to after-sales support, is excited to announce this strategic partnership with Steeler Yachts, marking a significant milestone for both companies.

Dutch American Yachts will offer a unique proposition to extremely demanding and experienced boat buyers: Dutch-built excellence tailored to an in-depth understanding of the US market and backed by a strong focus on customer service. That's what the Dutch American yachts proposition is all about - providing the best yachts with the best support in the industry, with company-owned service centers across the USA.
